Tips & Tricks TecLocal 3.0: Suppliers – Address and TecCom Contact Person

Do you have a TecCom supplier but need the right contact person to activate the business relationship? Do you need a telephone number or e-mail address to get answers to your questions? This issue of Tips & Tricks shows you how to use your active TecLocal to find the right person right away. It is quick and easy!

Under Administration select "Members."

The screenshot shows the 'Administration' window of TecLocal. The 'Members' tab is selected. The 'Access' section is expanded, showing the following configuration options:

- Application Server (URL):** Address: 139.24.176.8/scripts/TecServer.dll:443 (www.teccom.de/scripts/TecGate.dll:443)
- Parameters:**
 - Max. Waiting Time (sec.): 120
 - Radio buttons: Default, Direct, Proxy
- TEC Gate address (URL):**
 - Access via TEC Gate
 - Host: [text field]
 - Program: [text field]
 - Port: [text field]
 - Protocol: HTTP, HTTPS
- Access TEC Net:**
 - Via ENX
 - Via Internet Provider

Start a member request by entering the data you know in the tab "Request." Then click on the button "Request." The results list contains a maximum of 500 entries. If there are more you should add more search criteria to reduce the number of results. The percent character "%" is a placeholder. For example, to show all suppliers with "ro" in their names enter "%ro%" in the name field.

The results list is sorted alphabetically. You can reverse the order by clicking on "Name." You can also sort by "City." The third possibility is to sort by supplier or customer by clicking on the column between "Name" and "City." You can recognize a supplier by the arrow in that column.

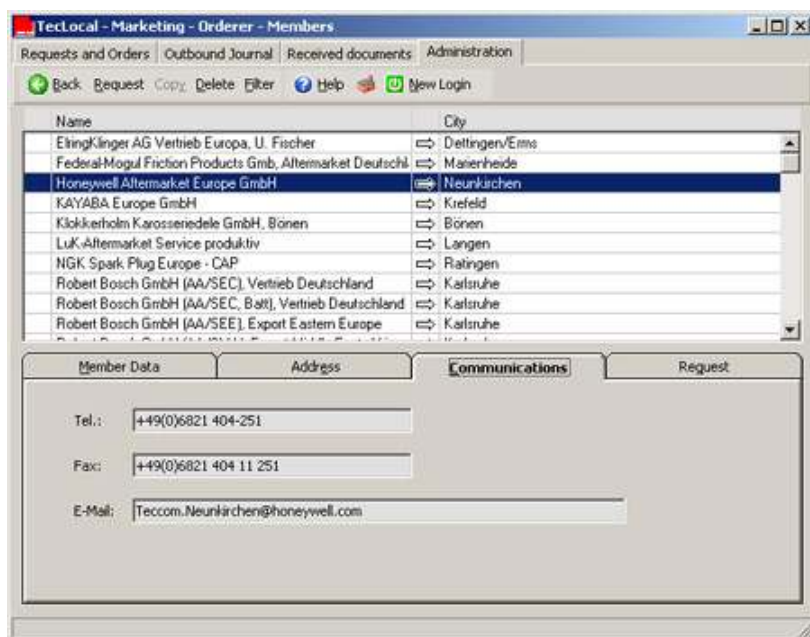

Mark the results you want. In the tab "Address" you can find the current address. The supplier updates this himself if necessary! Normally the name of the contact person is in the second line of the name in the address.

The screenshot shows the 'Address' tab for the selected member 'Honeywell Aftermarket Europe GmbH'. The address details are displayed in a form.
