

TecClassic Supply – the comfortable way to connect your ERP system!

TecClassic Supply enables electronic receipt of inquiries and orders, saving them in a mirrored database. From this pre-file you can integrate the messages into your ERP system and process them. Reverse messages--like despatch advice, order confirmation and invoice--can also be sent to customers electronically. Information on available parts is mirrored from the ERP system to the pre-file with which the customer communicates. There is no need for the supplier to make his ERP system directly available to those outside his internal network.

Goals

- Seamless order processes through ERP integration
- Reduction of manual data entry
- Better customer service
- Reduced customer service workload and 24/7 availability
- Reduced IT costs
- Cost reductions for order process of up to 35%

Solution

TecClassic Supply – Go online with your ERP-system now!

- Connect your ERP system to TecCom using an interface
- Mirror the inventory of the ERP system in an external prefile
- Synchronization interval freely selectable from one hour minimum
- Low use of the ERP system
- Automatic generation and transmission of electronic process documents available as an option—order confirmation, delivery notification and invoicing.

Benefits

- Integrate inquiries and orders into your ERP system easily
- Send information on availability and pricing to customers electronically
- Send reverse messages (despatch advice, order confirmations, invoices) to customers electronically
- Reduce wrong deliveries by avoiding incorrect orders
- Avoid extra work by using only one medium
- Save time and money

Requirements

- WIN2000 Server
- ORACLE 9i license
- File transfer software to transfer data between the ERP system and the profile
- XML-Format for generating reverse messages (if your MMS does not support XML please use our offered Supply Converter)
