

TecComfort Order – the comfortable solution to connect your ERP system!

TecComfort Order gives complete access to all electronic order processing functionality direct from your own ERP system. For communication between the ERP and TecCom an interface is implemented which is customized to your software. This full integration mode enables you to send inquiries and orders directly from your ERP system. Supplier responses can be transferred automatically to your ERP system for further processing.

Goals

- Seamless order processing through ERP integration
- Savings of time and money in daily order management
- Availability of all suppliers from one platform
- Reduced IT costs

Solution

TecComfort Order – go online with your ERP system!

- Connect your ERP system to TecCom with an interface
- Optimize your ordering process by triggering orders directly from your ERP system and sending them to suppliers automatically
- Automatic receipt and processing of electronic reverse messages--order confirmations, delivery notifications and invoices—available as an option. Uses flat format or XML.
- Use your familiar ERP system user interface, boosted by a TecCom plug-in.

Benefits

- Availability information is sent directly by suppliers electronically - you can react quickly and flexibly
- Product data can be imported from the ERP system and electronic parts catalogs - reducing product identification errors
- Orders are generated in the ERP system and then sent electronically - saving time in daily order management
- By integrating transaction documents into your ERP system you can easily monitor order status and optimize warehouse management
- No training required because you can work with your own user interface from your ERP system. Additional functions are delivered in a separate TecCom plug-in.

Requirements

- Capable ERP system
- Internet connection (DSL recommended)
- Support of your ERP software house is required for integration into your ERP system
