

### **TecEntry Order – the fastest way to the electronic order process!**

Entry Order is the fast and easy way to get connected to the world of electronic business at low cost. Based on the TecLocal client application, this product package offers all elementary functionalities for the creation and sending of requests and orders online as well as the automated receipt of availability information and transaction related documents from the suppliers. A customizable interface can be installed for the transfer of data into your ERP system.

#### **Targets**

- Seamless links in the order process through ERP integration
- Saving time and money in the daily order management
- Reaching all your suppliers over one platform
- Reducing IT-efforts

#### **Solution**

TecEntry Order – Optimize your order process

- Use the Local Client or our Web Application
- Available as single user or network installation
- Support of MS-ACCESS and ORACLE databases
- Use HTTPS communication protocol for a secure transmission of data
- Messages are send in an XML format
- Saving of all inquiries and orders ever did in a special outbound journal
- Supporting various formats of your MMS order file like .xml, .csv, .xls, .txt an many others

#### **Advantages**

- All functionalities for your daily business are available in one application - providing seamless links in the order process
- Availability information is received directly online - you can operate quickly and react flexibly
- Products can be identified and imported directly from electronic parts catalogues - decreasing errors in item entries
- The interface enables you to transfer purchase order data into the ERP system where the processed data can be displayed
- Order Tracking, if supported by the supplier, lets you monitor the current status of an order - a tool to optimize your warehouse management.
